Embedded Autosar Developer

ID: 1323 | 3-6 yrs | Pune | partner

- Exposure to AUTOSAR based development for TC3x Infineon micro-controllers.
- **Works closely with AUTOSAR architect, designers to implement BSW configuration.**
- **Complete BSW Stack configuration including MCAL to service layer modules (DEM,DCM,COM,OS,NVM,BSWM,ECUM) for safety critical products**
- Perform required static and dynamic analysis on implemented software to provide optimized solutions.
- Deep understanding of multicore architecture with TC3x micro controller.
- Demonstrated experience of ASPICE SWE1 to SWE6 process compliance on recent projects
- Awareness of different HIL/SIL methodologies, integration nd qualification tests.
- Capability to drive complex topics independently with effective analytical skills.
- Ability to lead and guide logical teams on technical topics.
- 5+ Years experience on AUTOSAR development
- 5+ Years experience in Automotive domain
- Good knowledge of Hardware - Software interfacing.

Benefits to know

1. Stable (Sustainable) product base company culture
2. Realistic KPI's and Good Increments
3. Cashless mediclaim policy over and above the CTC
4. Employee Stock Purchase Plans over and above the CTC
5. Flexible work atmosphere
6. 5 Day working
7. Onsite Opportunities
